

Project CY 8609

Task

1. Describe the technical facility located vic:

SG1A

2. Within the following ten year period determine if and when any "special events" occur:

* Note: If you do find any "special events" - - - subsequent sessions will be focused on each separate "special event."

STAGE 6 WORKSHEET

SOURCE:	003
MISSION NUMBER:	8609
SITE:	<div style="background-color: black; width: 80px; height: 20px; display: inline-block;"></div> SG1A
TARGET:	<u>SIGNIFICANT EVENTS (IF ANY)</u>

Since that
it's not to be
Don't not to be
from now. And caution
must be taken to prevent
too great a separation of the
areas of trial occurring so
as to drain attention to
it from other ideas who
the people involved don't
want to know about
the whole project.

frustrated

54 1/2 frustrated not because he's being harassed but
because things aren't happening at the rate he
wants. But he's the type that is long on drive +
ambition but short on patience, + even if things
happened even faster, it would never be fast
enough. "Things" involve other people performing
various but interlocking functions with a finite
and concrete conclusion to finally be reached.

54 1/2 what analysts & monitoring agencies would
pick up as far as outside activities &
device generated phenomena.

54 1/2 indicators - relevant/significant people gathering
changes in set patterns, RF scheduling; ^{equipment} interference
patterns; power shifting; a/cft operation in
vicinity.

Site ~~Spec~~ ^{Specific}
 construction + assembly of some actual device or equipment
 which is new/experimental, dangerous w/ perhaps weapon
 potentials + ~~will~~ ^{requiring} high power levels to accomplish
 purpose. Sub assembly trials have taken place, + soon
 in the future will be a major trial "run" of virtually
 the whole device. It won't be "finished" yet, but
 all major portions will be ready for interactive/
 interconnected testing. It involves meticulous
 construction + meticulous engineering. Caution must be
 taken to avoid too much "signature" during the test to
 draw unwanted outside attention. Device + ~~its~~ ^{it}
~~will~~ ^{is} located in a structure which is part
 old (masonry) part new (partially metallic) which has a
 "science theme" about it, it constructed haphazardly,
 and may have wings + a courtyard or open area
 associated with the middle part of it.
